About Me

I am a dedicated tech enthusiast with a passion for staying ahead of the latest trends and emerging technologies. Constantly refining my skills, I strive to deliver innovative solutions that exceed user expectations. My goal is to leverage my technical expertise to contribute to dynamic projects while fostering professional growth and self-development. I am excited to collaborate with talented teams and create high quality results that drive organizational success and reflect resourcefulness, innovation, and a commitment to excellence.

Soft Skills

- Teamwork
- Active listening
- Time Management'
- Respectfulness
- Work Ethic

Projects

Online Admission System Website
- Designed and developed a dynamic website for managing school admission processes using PHP, HTML, and CSS. The project streamlined student registrations, applications, and administrative tasks, offering a user-friendly interface for both applicants and administrators

Online Hotel Booking System
- Developed a user-friendly web application for hotel booking using PHP, HTML, and CSS. The system allowed users to search for available hotels, view room details, and make online reservations securely. Key features included real-time availability updates, user authentication, booking confirmation via email, and a responsive design for seamless access across devices.

Certifications

- The Role of the Youth in Peacebuilding

- Robotics with IoT Digital Marketing Fundamentals
